C:\Issue Tracker-(Django Milestone Project)\issuetracker-project (master -> origin)
(myvenv) λ python manage.py test
Creating test database for alias 'default'...
System check identified no issues (0 silenced).
..
....C:\Issue Tracker-(Django Milestone Project)\myvenv\lib\site-packages\storages\backends\s3boto3.py:282: UserWarning: The default behavior of S3Boto3Storage is to
re and will change in django-storages 2.0. By default files and new buckets are saved with an ACL of 'public-read' (globally publicly readable). Version 2.0 will c
t to using the bucket's ACL. To opt into the new behavior set AWS_DEFAULT_ACL = None, otherwise to silence this warning explicitly set AWS_DEFAULT_ACL.
    "The default behavior of S3Boto3Storage is insecure and will change "
